How to use Slidecite

- A short demo on how to use Slidecite.
- Use `slidebibliography` and `slidebibentry` commands to create the bibliography, similarly as with `thebibliography` environment.
- Use command `slidecite` to make a citation
- The source code can be found from [1]
- You can refer to the same url [1] again, of course.
- The answer to life according to [2] is 42.

[2] D. Adams, "The Hitchhiker's Guide to the Galaxy," Pan Books, 1979.

How to use Slidecite

- The numbering continues on the next slide. It uses natural numbers [3].
- You can drop the footer using the command `withfootnotes` to make more room for citations and footnotes.
- Anyway, here is a picture of a cat from [4]

[3] https://en.wikipedia.org/wiki/Natural_number

[4] By Original image: Sean McGrath from Saint John, NB, CanadaDerived image: Black Rainbow 999 - This file has been extracted from another file, CC BY 2.0, https://commons.wikimedia.org/w/index.php?curid=60287175

Missing features

- You can refer to items in previous slides [4], [2] but they don't currently appear to the bottom of the slide.
- You can't currently get a list of all references e.g. to be displayed once more in the end of the presentation.
- This thing is implemented as a glorified enumerate environment, with a custom counter. It's really dead simple so feel free to improve it further.
